

Red Hot World Buffet

Foster operating under Red Hot Conditions

When award winning restaurant chain Red Hot World Buffet opened their new premises in Liverpool One, they decided that they needed an award winning refrigeration company to supply the complete refrigeration package.

Liverpool One is situated on a 42 acre site of under utilised land within the city, and the development has given Liverpool a dramatic lift in its ranking among British retail destinations as well as a boost to the local economy. Liverpool One attracts nearly two million visitors a month and Red Hot World Buffet is just one of 37 food establishments on site.

Red Hot World Buffet offers the most varied food the world has within a beautiful yet contemporary setting. The dishes are created at live cooking stations by the finest chefs from around the world.

Foster installed single, double and triple compartment coldrooms within the concession's kitchen in Liverpool One. A large number of Foster's award winning refrigerated Eco Pro cabinets and under counters were also installed on site. The equipment was selected due to its quality, reliability, durability and ability to maintain temperature during periods of high demand as well as their award winning environmental credentials.

General Catering Supplies (GCS) were awarded the contract to develop operational foodservice strategies within the site, whilst Foster – in close partnership with GCS project managed and delivered the complete installation of all the refrigeration on-site.

Foster Refrigerator has over 40 years of refrigeration expertise, and offers expert advice, site surveys, method statements and risk assessment, specialist technology, full legislative compliance and quality installation to ensure the ideal solution for their clients' catering facilities.

3 Compartment Chiller Room 8.4x3.0x2.3M

2 Compartment Chiller Room 6.6x2.0x2.3M

Freezer Room's 2.7x2.7x2.3M

"Foster products are strong, robust and capable of surviving in our tough, high usage kitchens. They are also highly energy efficient, I can claim back on the ECA tax scheme. I was also able to spread our payments over 12 months by using the 'Interest Free package'. I will certainly be using Foster at our forthcoming new sites."
