

The Grange St. Paul's Hotel

Five Star Refrigeration for Five Star Hotel

With a sophisticated blend of graceful style and modern flair, the stunning Grange St Paul's Hotel sets new standards for luxury and elegance. Perfectly located in the heart of the City's financial district yet just moments from the myriad delights of London's renowned West End, the Grange St Paul's provides a perfect venue for visitors to the capital.

As part of this new build project, Foster Refrigerator was challenged with providing a refrigeration solution for the multiple requirements across the hotel complex. In total over 40 refrigeration products, ranging from upright cabinets and counters to prep stations and coldrooms, were specified for the project. It was a logistically complex setup as the installation was carried out across 13 different locations within the hotel, meaning advanced levels of project management were of paramount importance to the successful launch of the hotel by the deadlines put in place by the client.

The complex catering infrastructure at The Grange St Paul's Hotel was designed by A&E Partnership, with Foster Refrigerator providing the project management, engineering and installation for the refrigeration element. With such a large scale new installation, both Foster and A&E Partnership needed to use their vast industry experience to overcome the associated issues with a project of this scale, such as the location of condensing units, and the added complexity of multiple catering locations.

All in all, it can now be said that the outstanding five star Grange St. Paul's Hotel has an equally impressive catering facility to match the exceptional standards found throughout the building.
